

CS, CS Sconce & CS Wall Mount Luminaires introduced by Prolume

FOR IMMEDIATE RELEASE

Randolph, VT (May 22, 2019) – **Prolume, an LEDdynamics, Inc.** company, introduces the CS, CSS and CSW linear luminaires.

Within an anodized aluminum housing, a light engine (dual row of Cree LED's) illuminates the custom frosted lens uniformly. Five-hundred-twenty-five (525) lumens per foot, IP67 options, custom fixture **lengths to the inch** and a variety of wall and ceiling mounting options, enable the CS, CSS and CSW to impress both indoors and out. "Combining the insights of our lighting designer and agent networks with top level engineering across mechanics, optics and electronics we create solutions for the most exacting lighting applications" said William McGrath, Chief Technical Officer.

"The CS, CS sconce and CS wall mount linear luminaires elegantly complement modern architectural spaces. Our lighting designers imaginative lighting products exceed functional expectations while creating new aesthetics. From one new platform three new visually appealing fixtures are offered that emphasis craftsmanship, and refinement", elaborated Daniel Yasi, Jr., Vice President of Sales & Marketing.

Features:

- Made in America
- Standard and High Output options
- Custom fixture lengths
- Dry, Damp & IP67 ratings
- 150° articulation (on CS & CSW)
- Dimmable
- UL Certified
